

Vacancies for BSc/MSc/Diploma/M.D. theses

Center of Physiology, Dept. Neurophysiology and Cellular Biophysics

We offer vacancies for

BSc/MSc/Diploma/M.D. theses at the University of Göttingen in Neuroscience/ Olfactory Neurophysiology

Vacancies for BSc/MSc/Diploma/M.D. theses are currently available in our research group “Neurophysiology and Cellular Biophysics” at the Institute of Physiology, Göttingen, Germany. The research topic lies in the field of vertebrate olfaction and includes different techniques in fluorescence imaging, molecular biology, electrophysiology and pharmacology.

We are looking for a highly motivated but also open- and team-minded candidate, who has the willingness to learn and apply new techniques in the field of neurosciences. You will join an international research group with members from more than 8 nationalities and different scientific backgrounds that offer many opportunities for scientific exchange. Applicants are requested to have a background in biology, biochemistry, physics, molecular medicine, medicine or a related field. Experiences in the field of physiology, biophysics, molecular biology or fluorescence microscopy are a plus. Depending on the current situation we may be able to offer an expense allowance on level of a student assistant.

For information about the research group see <http://www.ukmn.gwdg.de>. The group is also part of the Bernstein Center of Computational Neuroscience Göttingen (<http://www.bccn-goettingen.de>) and of the DFG Research Center Molecular Physiology of the Brain (<http://www.cmpb.uni-goettingen.de>).

Women are especially encouraged to apply. Handicapped applicants with equal qualifications will be given preferential treatment.

For more information or to apply, please send an email to Dr. Sebastian Gliem (sgliem@gwdg.de) and include a CV and a short statement about your motivation and interests.
